How do Huawei routers work?

HUAWEI routers are integrated into one mesh network, allowing your devices to seamlessly switch to whichever router can provide the best Wi-Fi signal. No matter where you are in your home, you can always enjoy smooth streaming and high-quality video. Setting up a multi-router network doesn't need to be complicated.

How to connect a router to a Huawei HiLink mesh network?

1. For 2-pack and 3-pack routers, simply plug in to pair. For individual routers, you can pair them to the mesh network with one-click pairing. HUAWEI HiLink Mesh can create whole home Wi-Fi that eliminates deadspots, features seamless roaming and one-click pairing.

How do I login to Huawei?

Open a browser. In the address box, enter 192.168.1.1. Enter the login user name (user by default) and password Press Enter. (HuaweiUser by default). Click Login. To protect against unauthorized access, change the user name and password after the first login.
