The company is currently developing more than 10 GW of wind, solar, and energy storage projects across Southeast Europe, including Montenegro, Albania, Serbia, Romania, and ...

From initial system design and engineering to ongoing maintenance, optimization, and performance monitoring, FTMRS SOLAR ensures your photovoltaic and energy storage solutions operate at peak ...

Huawei has played a pivotal role in this sustainable endeavor by constructing the largest photovoltaic-energy storage microgrid station globally, featuring a massive 400MW solar PV system ...

The Comoros Solar Energy Access Project is set to revolutionize the energy infrastructure of the Comoros by integrating solar power with advanced storage solutions.

Ukrainian private utility DTEK has energised the largest battery storage project in the war-torn country and one of the biggest ones in Eastern Europe. The 200 MW/400 MWh installation spans six sites ...

Montenegro's largest power utility, EPCG, said it plans to develop lithium-ion battery energy storage systems at four locations in order to harness excess renewable energy production and ensure the ...

Huawei's energy storage project is advancing significantly, with distinct milestones achieved in 2023, expanding its global influence in renewable energy solutions, increasing partnerships with local ...

The utility has also decided to install a 5 MWh battery energy storage system alongside its proposed Kapino Polje solar power plant, which would have 5 MW of installed capacity.
