What is the rooftop solar PV comparison update?

The Rooftop Solar PV Comparison Update produced by CAN Europe and eco-union, with contributions from our members, is an updated version of the Rooftop Solar PV Comparison Report published by CAN Europe in May 2022.

Are EU member states facilitating rooftop solar deployment?

The report examines EU Member States (Bulgaria, France, Germany, Greece, Italy, Latvia, Lithuania, Portugal, Romania, Spain and Sweden) on their good and bad practices when it comes to facilitating rooftop solar deployment in the EU.

How much solar power does Europe have in 2024?

The bulk of EU solar power comes from building installations, which make up around two-thirds (over 220 GW) of current EU solar capacity. Despite a recent slowdown in the rooftop segment, it still provided close to 60% of Europe's newly installed solar capacity in 2024, and the prominence of rooftop solar is unlikely to change in the foreseeable.

Will smart solar buildings meet Europe's energy security needs by 2030?

Our modelling shows, that by 2030, smart solar building solutions could meet more than half of EU daily energy system flexibility needs, and a third of its annual flexibility needs. That means a more cost-effective system, resilient to shocks and strengthening Europe's energy security.

Such restrictions would target Huawei first and foremost, as the dominant Chinese supplier of critical parts of these systems. The fears center around solar panel inverters, a piece of ...

Share this on social media Huawei's solar tech sparks fears of Europe's next dependency crisis (Politico, 24 Oct 2025) Cyber officials fear the Chinese tech giant's grip on energy networks. ...

But in Innsbruck, Other's team saw untapped potential: empty industrial rooftops. Now, 4,128 solar panels turn concrete into clean energy, producing power at EUR0.035/kWh--far below Austria's ...

Explore the insights of PV Europe! Learn about solar benefits, costs, and factors before installation. Find out if solar energy is worth it in the EU.

The Broader Implications of Chinese Control The issue of Huawei's influence in the solar sector is
