Through the application of a series of cutting-edge technologies, such as GW-level black start and off-grid continuous fault ride-through, the Red Sea Project has achieved 100% PV+ESS power supply and become a global benchmark for large microgrids. Delivery of the project was completed in Oct. 2023.

As a cornerstone of SaudiVision2030, the Red Sea Project now stands as the world's largest microgrid energy storage project, with a storage capacity of 1.3GWh. Utilizing Huawei FusionSolar Smart ...

The station includes 400 MW of PV capacity and 1.3 GWh of electrochemical energy storage. Covering 100 km of grid infrastructure, it is the world's first independent microgrid project to ...

The project will install a 400 megawatt (MW) photovoltaic system along with a 1300 megawatt-hour (MWh) battery energy storage solution (BESS) on the coast of the Red Sea, making ...

Featuring a 400MW solar PV system coupled with a 1.3GWh energy storage system, this ambitious project is set to revolutionize sustainable energy solutions in hospitality. Global technology...

As a cornerstone of SaudiVision2030, the Red Sea project now stands as the world's largest microgrid energystorage project, with a storage capacity of 1.3GWh. Utilizing Huawei's Smart String ESS ...

At the summit, Huawei Digital Power and SEPCOIII Electric Power Construction Co. Ltd. (SEPCOIII) signed a contract for the The Red Sea Project and will cooperate to help Saudi Arabia ...

Global technology giant, Huawei, is spearheading this ambitious venture, which is set to power this key hospitality destination being developed by Red Sea Global. Built on the coast of...
