EtherWAN's EasyPoE Pro Series is an integrated outdoor enclosure solution that combines a managed PoE switch, fiber splice tray, power supply, and optional accessories such as a 4G LTE ...

Integrating power supply system, environment monitoring system, temperature control system and backup power system, It has the advantage of high-reliability, high-efficiency, high-flexibility, safe and ...

With a wide input voltage range (100 to 240V AC) and operating temperatures from -4°F to 140°F, the Outdoor UPS Power System ensures consistent performance and system reliability in inclement ...

This includes hardened outdoor enclosures, uninterruptible power supply (UPS) modules, specialty batteries, accessories and generators that can be custom integrated to meet your application.

The core consists of three parts - photovoltaic power generation, energy storage batteries, and charging piles. These three parts form a microgrid, using photovoltaic power ...

CPSY outdoor integrated UPS systems are ruggedized backup power supplies designed to support access control, security, utility and telecommunications applications, most of which are located in ...

Backup power: Supply power to the load when the power grid is out of power, or use as backup power in off-grid areas. Enhance power system stability: Smooth out the intermittent output of renewable ...

Support RS485 serial port, CAN, wireless 4G, Bluetooth communication, dry contact and other communication interfaces. Perfect lightning protection design, suitable for areas with many ...
