-----

The tower internals provide means of access, lighting and safety for maintenance and service personnel, plus means of transferring hand tools and components to the nacelle.

We supply various wind turbine tower internals and internal kits and assemblies to industry leaders such as GE Power, ENERCON, Acciona, TSP, and UNISON.

It is a large and heavy structured block of concrete that must hold the whole turbine and the forces that affect it. For offshore turbines, the base is under the water and cannot be seen.

Our supply chains are specialists in purchasing and handling components that supply a total solution to the tower producer as complete and timely deliveries. In addition to supplying internals, we offer pre ...

Design of these components and the nature of the welding connection has an impact on the load capacity of the tower tubing, in particular in the fatigue limit state (FLS)! Therefore, specification as ...

Wind Turbine Tower Door  
Wind Turbine Tower Entrance Stairway  
Wind Turbine Tower Ladders  
Wind Turbine Tower Platform  
Wind turbine tower is made of steel sheet, which has very smooth surface both inside and out. Therefore, to climb up to a certain height, we have to set up ladders on the inner surface of wind towers. Aluminum ladders are more popular than steel ladders, and most of the wind farm owners would like to weld the ladders on each tower section during wi...

Tower internals for Wind Turbines  
Resolux ApS designs and manufactures electrical internals and light kits for wind turbines worldwide. We supply you with easy to use complete solutions, fit to your needs and incorporating unique technical ...

One of the major technological challenges the wind power industry encounters now is to build a taller wind tower preferably higher than 120 meters from ground to harvest high quality and low cost

This ATP was onshore installed in a damped suspension arrangement prior to the offshore pile driving operation. Recently, we have developed a internal ATP with a Client (patent pending), which saved ...
