Where can I buy a 24 volt inverter?

Shop now at RoadKing and get the power you need wherever your journey takes you. A range of 24v to 240v mains inverters including power, soft start & pure sine wave 24 volt inverters, Shop for a Waeco, Skytronic or RoadKing 24v inverter.

How much power does a 24V inverter consume?

A good sized 24V inverter could use about as much power just being on as your lights do. If the lights consume 45 watts and run for 12 hours a day, the total power usage would be 45 watts x 12 hours = 540 watts. The battery power required for losses plus the load could double that. The lights themselves may be DC, using a small transformer (wall wart) to go from 120Vac to (likely) 12Vdc.
