-----

EirGrid, SONI, and SEMO have launched a major update to the electricity grid's Scheduling and Dispatch system, paving the way for large-scale battery storage to play a bigger role ...

New wholesale electricity market rules have been introduced in Ireland, designed to allow battery storage assets to participate directly.

Experts from across the energy industry emphasised the importance of energy storage to enhance grid flexibility, support renewable integration, and promote industry decarbonisation.

The Electricity Storage Policy Framework 2024, published in July 2024, aims to harness the full potential of the role storage plays in supporting grid stability, boosting renewable energy ...

By facilitating the integration of a growing volume of renewable energy on the grid to meet Ireland's climate targets, BESS will be a critical technology on the path to eliminating carbon from our ...

Soon, SEMO, the operator of the wholesale energy market in Ireland, will allow battery energy storage systems (BESS) to play a much larger role in balancing power across the island. ...

But Ireland's grid congestion and generation imbalance mean strategic grid-side storage can be even more impactful-easing local constraints, absorbing excess wind, and supporting voltage ...

Ireland's energy storage could increase eightfold by 2035, according to a new report by Energy Storage Ireland. It states that battery storage has the potential to provide secure,...
