How much battery does a OnePlus X have?

The OnePlus X packs a non-removable 2,525mAh battery, which is about average capacity for a 5-inch 1080p smartphone. The Oppo R7 has a 2,320mAh cell, the recently reviewed HTC One A9 with its 2,150mAh is noticeably underpowered compared to OnePlus' model, while the Xiaomi Mi 4c has a generous 3,080mAh battery.

How bright is the OnePlus X?

When it comes to maximum brightness, the OnePlus X wouldn't go as high as some other AMOLED phones but it's quite alright and only flagship segment phones do better. It's actually around the same level as the HTC One A9 and this one while not being very bright to begin with, has twice the price tag.

Is the OnePlus X a good phone?

The OnePlus X packs a 5-inch AMOLED display, which is a great treat for such an affordable mid-ranger. It's a high-quality panel of 1080p resolution, which delivers 441ppi of pixel density. While not record-breaking numbers, individual pixels are nonetheless indistinguishable to the naked eye and so is the Diamond PenTile matrix.

Does OnePlus X have a camera?

Equipped with ISOCELL technology, light sensitivity is increased for sharper images and less noise. The front-facing shooter on the OnePlus X leads the way in unmatched quality with an 8MP camera, f/2.4 aperture, and supported Beauty Mode for effortless, flawless photos every time.

The OnePlus 13 delivers 4K Dolby Vision video on all cameras, a 6000 mAh silicon-carbon battery, and Snapdragon 8 Elite power. Buy OnePlus 13 at OnePlus United States.
