Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...

As of 2023, China still produces over 75% of the world's polysilicon for solar panels, with around 45% from Xinjiang. This means that a significant share of solar panels on the global market may have ...

This website aims to raise awareness about the most commonly faced problems by migrant workers, and it highlights the Department of Labor's commitment and efforts to protect ...

Federal labor laws are intended to protect workers from retaliation for asking about or exercising their rights. You have the right to file a claim without retaliation.

The problem is that it's hard to get permission to work in the U.S. before getting a job offer. Most work permit and visa applications can take months or even a year to be approved. Being ...

Incentivized by US federal policy such as the Bipartisan Infrastructure Law (BIL) and the Inflation Reduction Act (IRA), the solar industry is poised to continue creating new jobs that require...

Although not required for employment, certification demonstrates competency in solar panel installation. Some states require that for projects to qualify for solar-related subsidies, all PV ...

In particular, in most EU member states there is a lack of legal clarity and safeguards to ensure migrant workers are not exposed to detention and deportation if they attempt to access labour justice and ...
