-----

In 2024, Italy achieved its strongest year of solar growth in over a decade, installing 6.7 GW of new photovoltaic (PV) capacity and bringing cumulative capacity to 37 GW. PV generation reached 36 ...

Italy's solar power capacity rose by 1.7 gigawatts (GW) in the first quarter to 32 GW thanks to a jump in the development of large projects, the country's association for the photovoltaic ...

Fiera Milano, a trade fair organizer in Milan, has switched on Italy's largest rooftop PV system - an 18 MW array deployed on the pavilions of its exhibition center in Rho, near Milan.

Areas to the south and east of Milan are best suited for large-scale solar PV due to their higher elevation and more direct sunlight exposure.

BIG tops out citywave, a 140-meter-long solar canopy in milan, set to become one of the world's largest urban photovoltaic installations.

The Energy Finalized Project Number 1 (PFE1) in 1972 and PFE2 in 1982 were started with the aim of promoting an energy saving culture in Italy, including energy efficiency and solar energy.

Milan Fairgrounds has installed the biggest photovoltaic system in Italy, generating 22 GWh for on-site use & feeding excess energy into the Italian grid.

CityWave, a 459-foot-long solar canopy, is set to become one of the world's largest urban rooftop photovoltaic installations in Milan's CityLife district.
