A new report by Think Microgrid says most states are doing an insufficient job at deploying microgrids despite developing microgrid roadmaps.

NLR has developed a cyber-physical test bed to investigate the complex interactions among emerging microgrid technologies such as grid-interactive power sources, control systems, ...

To deal with this problem, this research first reviews the real-world and simulation cases of zero-carbon microgrids in recent years and classifies them into two categories, i.e., on-grid mode ...

Using peer-reviewed publications from 2013 to 2024 using the most commonly used reporting items for Systematic Reviews and Meta-Analyses approach, this study examines ...

The concept of microgrids (MGs) as compact power systems, incorporating distributed energy resources, generating units, storage systems, and loads, is widely acknowledged in the ...

Read about the transformative trends underscoring how microgrids are driving the New Energy Landscape in 2025.

Think Microgrid has released its 2024 State Scorecard, revealing that while some states are making incremental advances in microgrid policy and deployment, the overall landscape remains ...

Data center operators and other major power users are fuelling a new wave of microgrid investment as they seek access to reliable power supplies that can be developed swiftly.
