You've probably heard about solar panels and wind turbines, but here's the million-dollar question: what happens when the sun isn't shining or wind stops blowing? That's exactly where the Lima Shared ...

When the Lima Power Plant recently won the bid for a major energy storage project, it wasn't just another corporate press release. This move signals a tectonic shift in how utilities are ...

The project utilizes GSL ENERGY's new generation HUB series high-efficiency energy storage solution, with a total capacity of 500 kWh, composed of 100 parallel-connected 5 kWh ...

That's where the Lima Power Plant Energy Storage Project steps in, tackling renewable energy's Achilles' heel with a 600MWh battery system that's reshaping Peru's energy landscape. Let's unpack ...

When Lima announced its shared energy storage project bidding initiative last month, engineers started buzzing like bees around a solar panel factory. This isn't just another green energy ...

KenGen, Kenya's leading electricity generation company, has launched a tender for a solar-plus-storage project named the Seven Forks solar power project, located approximately 150 km northeast of ...

This project provides a continuous and stable green power supply to local remote villages, marking another significant milestone for GSL ENERGY in global off-grid energy storage applications.

Imagine Lima's bustling streets suddenly going dark because a cloud passed over a solar farm--sounds like a bad comedy sketch, right? But this isn't fiction. Peru's mountainous terrain ...
