-----

What began as a practical challenge managing vegetation across our Texas solar sites has become the largest solar grazing agreement announced in the United States, with over 13,000 ...

Combining solar power generation and cattle grazing maximizes land productivity and reduces tension between renewable energy and agriculture. According to Silicon Ranch CTO Nick ...

In 2019, Silicon Ranch began exploring the opportunity to marry cattle grazing and solar generation on our land, in line with our commitment to design, build, and operate better solar farms by taking a ...

In a novel blend of agriculture and renewable energy, hundreds of sheep were recruited by Mon Power to maintain vegetation this fall around 50,000 solar panels adjacent to our Fort Martin ...

In a novel blend of agriculture and renewable energy, hundreds of sheep were recruited to maintain vegetation this fall around 50,000 solar panels adjacent to the Fort Martin Power Station.

Solar grazing allows us to keep the site operating efficiently while supporting local farmers and reducing our environmental footprint. By partnering with sheep farmers and advancing ...

Solar energy and sheep can coexist--and even benefit from each other. Sheep and solar panels work hand in hand to generate enough power for a small town.

This one-day course equips solar professionals to evaluate the operational benefits of solar grazing and safely perform operations and maintenance (O& M) on livestock-integrated solar sites.
