What is California's energy storage procurement framework?

California's energy storage ecosystem, built since Assembly Bill 2514 and through 2021, includes a crucial component: the PU's Energy Storage Procurement Framework. This framework motivates the development of both demand and supply in the energy storage marketplace.

What does the PU's Energy Storage Procurement Framework do?

The PU's Energy Storage Procurement Framework provides crucial motivation to the development of both demand and supply in this marketplace. Since the time of Assembly Bill 2514 and through 2021 California built a rich ecosystem for energy storage research and development, commercialization, and project deployment.

What type of energy storage projects are recent contracts for?

Recent contracts are predominantly for much larger transmission-connected energy storage projects. Earlier energy storage contracts were significantly more expensive across all grid domains, and they generally reflect the cost reductions seen in the global storage industry.

Are high soft costs a barrier to energy storage deployment?

In 2018, the New York Public Service Commission (NY PSC) identified high soft costs as a major barrier for energy storage deployment in their state. The CPUC Energy Storage Procurement Study aims to address similar challenges in California.

This is the first solicitation pursuant to Section 83E and it is part of a staggered procurement schedule developed by DOER, in coordination with the Distribution Companies, in ...

Long-Term Strategic Monitoring and Information Sharing ..... 83 Contracting and Procurement Guides ..... 83 Key Programs for Solutions ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests for Proposal (RFPs), Power Purchase ...

This report is to address the fourteen questions outlined in Section 16-135(g) of the Public Utilities Act ("Key Questions") and to recommend the most effective procurement process, structure, and contract ...

The procurement schedule, consistent with Section 83E will ensure: (i) approximately 1,500 megawatts of
