This review comprehensively examines the treatment technologies for fluorine-rich, ammonia-rich, and nitrate-rich PV wastewater, revealing the advantages, disadvantages, and ...

Biocell Water containerised wastewater treatment plants offer a fast and effective above ground portable wastewater treatment system solution for any site, without the need for any existing infrastructure.

The HORIZON system targets industrial spaces such as wastewater treatment plants and car parks. Its wide column spacings and ample height enable dual use of space with easy ...

Low costs for scheduling and construction, as no infrastructure or buildings are required. Only a solid base or foundation is needed on which to place the containers. The solution is modular, fully ...

LZY Solar Containers use proprietary folding panel technology to maximize power generation while maintaining standard shipping dimensions. Our systems are faster to deploy, generate more power ...

Foldable Solar Panel Containers are an innovative solution that is combined with solar power technology and logistical convenience. The mobile solar containers carry photovoltaic panels, ...

The concept of container solar systems takes the portability of foldable photovoltaic panels a step further. These systems integrate solar panels into shipping containers, transforming ...

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, ...
