Moment Energy's Luna battery energy storage system (BESS) is a modular, high-performance system designed to increase your business' energy resilience.

With 20 kWh of battery capacity, the Lunar System provides more energy for longer outage protection. It's the new standard to handle your home's growing energy needs. Lunar tracks severe weather to ...

Luna Storage and LAB are standalone lithium-ion battery storage projects in Lancaster, Los Angeles County, California. These projects store clean energy for use during periods of high demand or when ...

The Huawei Luna Energy Storage System (ESS) PV battery offers a modular solution tailored to your needs. With 5 kWh, 10 kWh, or 15 kWh and the ability to expand later, the Luna battery is ideal for ...

Its plant builds Luna BESS, a flexible system reaching 10 megawatt-hours by turning old EV batteries into useful power storage for companies and factories. This practice extends the life of ...

The 100 MW/400 MWh Luna Battery Storage Project is now operational and providing energy to Clean Power Alliance customers while strengthening grid reliability.

The Moment Energy plant creates the Luna BESS, a modular system that can be scaled up to 10 MWh and converts used batteries into high-performance energy storage for business and ...

Moment Energy's manufacturing hub, located in Metro Vancouver, BC, is in full-scale production, delivering its battery energy storage systems (BESS) across North America. The facility ...
