Gruner supports solar projects in Madagascar with engineering design, technical advisory, and battery storage solutions for reliable renewable energy.

Madagascar's energy situation, marked by frequent power outages and a constantly rising energy bill, necessitates collective action around strategic projects aimed at diversifying electricity ...

Construction work is already in progress, and the first phase of the solar plant is scheduled to enter operation in early 2026. Once fully developed, the project is expected to boost generation ...

This project was discussed at the FOCAC in China in September 2024 and has undergone a comprehensive study. As a result, President Andry Rajoelina has ordered its rapid ...

Madagascar has launched invitations to tender for two solar PV projects with a combined capacity of 210MW. The larger plant, with a capacity of 200MW, will be located in Ihazolava.

Madagascar is currently the fifth country in Africa in which a Scaling Solar tender process was launched, after two tender processes in Zambia, one in Senegal, and another in Ethiopia.

In a context of energy transition towards renewable energies, this case study situated in Madagascar allows us to verify the extent to which an on-grid photovoltaic solar power plant represents a vector ...

Balglobal partners with Mytilineos on a pioneering 5MW solar plant in Madagascar. The project will power mining operations, cut 8,000 tonnes of CO2, and boost clean energy.
