In-house IoT EMS hardware and software provide cost-effective solutions for managing distributed energy resources. Scalable from single asset control to complex microgrid and utility environments.

AZE's outdoor battery system is tailored for small to medium-sized commercial and industrial (C& I) energy storage applications. Its modular design not only minimizes the impact of local failures but ...

It provides the flexibility and resilience needed to accommodate increasing amounts of renewable energy, reducing reliance on fossil fuels and paving the way for a cleaner, more sustainable energy ...

These cabinets are designed with sealed structures, corrosion-resistant materials, and advanced thermal management systems that effectively regulate temperature and humidity within the enclosure.

Powering a 5G outdoor base station cabinet, a solar microgrid, or an industrial power node, the energy cabinet integrates power conversion, energy storage, and intelligent management ...

The base station power cabinet is a key equipment ensuring continuous power supply to base station devices, with LLVD (Load Low Voltage Disconnect) and BLVD (Battery Low Voltage Disconnect) ...

The EK-SG-D02 mobile outdoor simple energy cabinet is an integrated system for network communications, base station power supply and remote area site operations.

The outdoor energy cabinet supports hybrid configurations with solar + battery + grid or diesel generator. The EMS intelligently switches among power sources for optimal cost-efficiency and continuity.
