InterConnect Malta has been entrusted the responsibility to implement Battery Energy Storage Systems (BESS) to be connected to the Maltese National electric grid network.

Q: Malta's solution lies in thermo-electric energy storage. Why is this system so innovative, and what are its main keys? A: It combines well-established thermodynamic principles with modern technological ...

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy.

Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security.

Electro-thermal long-duration energy storage Malta Inc. and CA Infraestructuras Energía 2023, S.L.U (Cox), which specilises in the development of energy have agreed a strategic ...

Malta SEMS enables industrial and energy assets to decarbonize in the near term and provides a standout long-duration energy storage solution for renewable developments globally. Renewable ...

Malta's product line range offers flexible storage and grid reliability solutions for renewable power generation and the replacement needs of utility scale fossil gas and coal plants

This pioneering project, the first of its kind in Malta, will not only provide essential electricity storage but also play a crucial role in responding swiftly to balance the grid during periods ...
