Why Valletta Needs Advanced Energy Storage Systems As Malta's capital, Valletta faces unique energy challenges - limited land space, rising electricity demands, and ambitious EU climate targets. Large ...

Malta's grid-scale, long-duration energy storage system helps governments, utilities, and grid operators transition to low-cost, carbon free renewable energy while enhancing energy security.

Battery energy storage systems allow power to be stored and then discharged. This is a sample photo provided by Interconnect Malta. A project to build two massive battery storage...

“Utility-scale battery storage is a game changer for the electric grid. It provides the flexibility and resilience needed to accommodate increasing amounts of renewable energy, reducing reliance on ...

Malta's utility-scale, long-duration energy storage system uses steam-based heat pump technology to deliver dispatchable, cost-effective energy.

Interconnect Malta had launched the procurement process for the design and construction of two utility-scale Battery Energy Storage Systems (BESS). “These BESS will support a ...

Malta is taking a significant step forward in its clean energy transition, receiving 16 offers for the development of the country's first large-scale utility battery energy storage systems (BESS).

Interconnect Malta Ltd. (ICM) has been entrusted the responsibility to implement two Battery Energy Storage Systems (BESS) to be connected to the Maltese National electric grid network.
