Abstract: All-electric ships face multiple onboard pulse loads, including propulsion fluctuations resulting from uncertain navigation conditions, and the power demands of radar or ...

This study investigates the configuration of an energy storage system (ESS) and the optimization of energy management strategies for diesel-electric hybrid ships, with the goal of enhancing fuel ...

In order to improve the efficiency of ship energy management, Yinbo first established a mathematical model for energy management, using arrival time and carbon dioxide emissions as constraints.

A mathematical optimisation model is presented, to support battery investment decisions within hybrid electrical power and propulsion systems for maritime vessels.

In this paper, the cost model of the energy storage system is optimized based on the improved fish swarm algorithm, and the proposed energy storage system design scheme can ...

The precise form of mathematical functions describing these effects is established, while approximate methods for efficient computing of these functions are also proposed.

To address this issue, establish an optimization model and constraint conditions for capacity configuration of hybrid energy storage systems, and propose a decision-making method ...

The meaning of MATHEMATICAL is of, relating to, or according with mathematics. How to use mathematical in a sentence.
