The company is now seeking to move decisively into utility-scale storage, aligning itself with the broader growth of Mexico's power sector. With an investment capacity exceeding USD 1 ...

Thanks to the country's geographical conditions, Mexico has great potential for solar and wind energy, which makes it an ideal candidate for the implementation of energy storage systems to ...

Mexico is playing catch-up, with the world having installed around tens of megawatts of non-pumped-hydro energy storage sites by 2020, according to the United States Department of Energy.

We pioneered the technology over one decade ago, and today almost half our new projects include a storage component. Energy storage is a "force multiplier" for carbon-free energy.

Mexico has published the results of the 2025 Private Power Generation Projects Call, awarding more than 3 GW of renewable energy capacity and 1,257.4 MW of battery energy storage ...

This article addresses Mexico's strides in energy storage amid a lack of clear legislation. With a focus on renewable sources, it highlights the nation's 31.2 per cent installed capacity for ...

This report provides a high-level summary of the role that battery storage technologies can play in Mexico's transition toward higher penetrations of variable renewable energy generation.

By combining specific regulations, a storage mandate for new renewable projects, and long-term planning, Mexico is emerging - according to OLADE - as a regional benchmark for energy ...
