This article explores how the country's strategic investments in battery storage, pumped hydro, and hybrid systems are reshaping its energy landscape while creating opportunities for international ...

French energy storage specialist Entech partners with Eiffage &#201;nergie Systes to build two battery plants with a total capacity of 200 MW. Commissioning is scheduled for the first half of 2027.

Moroccan state power firm ONEE on 2 January announced that three consortia have been prequalified to construct the planned 300-400MW El Menzel pumped storage hydropower project. All three ...

The project aims to support ONEE's renewable energy related program with the aim of contributing to the country's 52% of Morocco's energy mix by 2030.

Morocco is aiming for a renewable energy mix of 52% by 2030, and this project is the third in a series of co-located solar and storage projects on the same land each titled Noor Midelt.

Let's unpack this: The North African nation's new 20GWh facility in Kenitra isn't just another factory - it's a strategic play to dominate Africa's clean energy transition while supplying European markets.

The north-west African country plans to build a 1,600 MW battery energy storage system to support its expanding renewable energy sector. The national power utility company is set to invite bids for the ...

On May 20, 2025, the Masen Agency announced a new pilot project called the "Morocco Energy Storage Testbed Project," validated by the World Bank. Deployed at the iconic Noor ...
