Our revolutionary Volstora battery energy storage systems, combined with our proprietary energy management software DAV3, provide everything you need to minimize your company's energy bills.

While second-life EV batteries make headlines globally, Namibia's focus remains on scalability and affordability. Our modular designs allow clients to start small (e.g., 10 kWh for a shop) and expand ...

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry ...

Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points and enable rapid grid growth to meet the ...

There is no doubt that ESS Inc will be a key player in energy storage for peak shaving and energy arbitrage for a more efficient use of the global electricity network with high renewable energy ...

Namibia peak shaving energy storage battery manufacturer. Our certified energy specialists provide round-the-clock monitoring and support for all installed home energy storage systems.

As global demand for renewable energy solutions surges, Namibia is emerging as a key player in energy storage battery manufacturing. This article explores how the country leverages its natural resources ...

How does physical PS work? If a peak load occurs above a defined threshold, this is shaved by the battery storage system. The storage system provides the electricity required. As a result, the ...
