Two 650-foot-tall (200-m) towers have risen in China's Gansu Province. Combined with an array of 30,000 mirrors arranged in concentric circles, the new facility is expected to generate over 1.8...

A twin-technology solar tower developed by researchers at the universities in Jordan and Qatar has been shown to deliver energy around the clock with double output.

A solar power tower, also known as "central tower" power plant or " heliostat " power plant, is a type of solar furnace using a tower to receive focused sunlight. It uses an array of flat, movable mirrors ...

The 110-megawatt Crescent Dunes Solar Energy Facility in Nevada is the first utility-scale concentrating solar plant that can provide electricity whenever it's needed most, even after dark.

To accurately reflect the changing cost of new electric power generators in the Annual Energy Outlook 2025 (AEO2025), EIA commissioned Sargent & Lundy (S& L) to evaluate the overnight capital cost ...

China has switched on its first dual-tower solar-thermal power station, using concentrated heat to generate power even after sunset.

Two 650-foot-tall (200-m) towers have risen in China's Gansu ...

As of 2023, it is operated by its new owner, Vinci SA, and in a new contract with NV Energy, it now supplies solar energy at night only, drawing on thermal energy stored each day.
