-----

A bladeless wind turbine, designed by the Spanish startup Vortex Bladeless, uses a vibrating upright cylinder to harvest wind power. Nicknamed "the Skybrator" by the internet due to its ...

With seven innovative wind turbine technologies of 2024 on the horizon, the domain of renewable energy is experiencing a significant shift. From smart turbines revolutionizing efficiency to ...

What Factors Should You Consider When Choosing the Best New Wind Generator? When choosing the best new wind generator, consider factors such as energy efficiency, installation ...

This is the bladeless wind turbine, or BWT, a promising new frontier in wind energy innovation. And thanks to a breakthrough study from engineers at the University of Glasgow, its ...

Eco-friendly bladeless small wind energy. Startup technology Vortex wind power for on-site generation, the low-cost wind turbine which is not a turbine!

Older wind turbine technologies were necessary steps forward but fell short in many ways. This next generation of wind power designs promises to fix those issues and pave the way for ...

New World Wind offers power generation solutions combining high technology and design, wind and solar, for perfect integration in urban and natural environments.

Modern wind turbines are increasingly cost-effective and more reliable, and have scaled up in size to multi-megawatt power ratings. Since 1999, the average turbine generating capacity has increased, ...
