By enhancing the stability and efficiency of renewable energy, BESS is a vital component in the transition to sustainable energy systems. However, several fundamental risk parameters ...

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW ...

Hitachi Energy has signed an agreement with Nordic Electro Power (NEPower) to provide advanced power conversion technology for Finland's largest battery energy storage system ...

The 70 MW/140 MWh BESS project will be located in Nivala, northern Finland. Set to go online in 2026, the facility will enhance grid stability, energy resilience and accelerate green ...

Utility EWII has connected a 30MW/43MWh BESS unit to the grid on the island of Bornholm in Denmark, which has the potential to act as an emergency backup in case a nearby ...

Merus Power, together with Alpiq, has achieved a historic milestone for the Nordic energy market: the delivery of the region's first grid-forming battery energy storage system (BESS).

Developer and optimiser Ingrid Capacity and storage owner-operator BW ESS have been working together to deliver 14 large BESS projects across the Swedish grid in tariff zones SE3 and SE4.

This transaction supports the company's ongoing ambition to accelerate the transition to renewable energy in the Nordic region. The 10MW BESS will be strategically located in SE3, helping ...
