This study uses a multi-objective optimization model to explore future configurations of generating and cooling technologies of the electric power sector in the North ...

Commercial building micro-grids will play an important role in the smart energy city. Stochastic and uncoordinated EVs charging activities, which may cause performance degradations and...

A diagram of the factors influencing households' energy consumption-investment behavior and their interactions with micro grid development is drawn, which significantly refreshes ...

Due to the late start of China's microgrid development and the relatively immature microgrid technologies and standards, as well as being in the early stages of promoting microgrids, ...

State Key Laboratory of Alternate Electrical Power System with Renewable Energy Sources, North China Electric Power University, Beijing, China.

North China Electric Power University - Cited by 3,568 - Distributed optimization and control of multiple sustainable energy sources in distribution network and micro-grid?

As one of the "Project 211" universities, North China Electric Power University (NCEPU) is a national key university under the direct jurisdiction of the Ministry of Education (MOE). The...

North China Electric Power University (NCEPU) is affiliated with the Ministry of Education, officially listed as one of the "211 Project" and "985 Project" universities as well as a "Predominant Discipline ...
