Is stationary energy storage a good idea in Norway?

Electric cars now account for 79 per cent of new cars sold in Norway, and the MS Medstraum was recently launched as the world's first electric fast ferry. In a global report on lithium-ion batteries, Norway ranked first in sustainability. These are impressive records. Even so, stationary energy storage is beginning to steal the limelight.

Does Norway have a battery market?

Today Norway has not one, but two huge battery markets. "There are two market drivers for batteries: EVs and stationary energy storage. Energy storage is coming on strong now. It's the key to turning intermittent wind and solar into a stable energy source," explains Pål Runde, Head of Battery Norway.

Why should we invest in EV battery recycling in Norway?

Our BESS holds immense potential for contributing to Norway's burgeoning clean energy landscape. Upon installation at the EV battery recycling facility, Hydrovolt, it will play a pivotal role in optimizing energy utilization and unlocking new revenue streams.

How big is Norway's battery market?

batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. Now, a more mature Norwegian battery industry has greater potential to accelerate the renewable energy transition in Europe. Today Norway has not one, but two huge battery markets.

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial incentives for EV ...

Finding good portable energy storage is really important if you need power when moving around. In Norway, theres many places selling them, but wholesale suppliers usually give better price and more ...

Last week marked a significant milestone for our company as we proudly received our inaugural Battery Energy Storage System (BESS) shipment in Norway, a ...

Why Oslo's Energy Storage Matters (And Why You Should Care) Let's face it - when you think of Oslo, fjords and Nordic winters probably come to mind before lithium batteries. But here's the ...

MADE IN NORWAY We take pride in designing and producing our Battery Storage Systems in Norway, maintaining full control over quality, safety, and supply chain integrity. EKODA is your trusted ...

Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies. Renowned for its ...

Norway is at the forefront of energy storage innovation, leveraging its rich hydropower heritage and cutting-edge technologies. Renowned for its extensive hydropower infrastructure, the ...

Last week marked a significant milestone for our company as we proudly received our inaugural Battery Energy Storage System (BESS) shipment in Norway, a nation known for its progressive stance ...
