Almost all primary schools and most secondary schools have banned mobile phones, a year after the official recommendation. "It's a huge success," says Education Minister Kari Nessa ...

Even before the Directorate of Education's national recommendations, several schools had already implemented various mobile phone restrictions. Following the recommendations, several ...

Recently, Norway has issued recommendations on the use of private mobile phones by pupils at school, largely advocating a ban on mobile phones at school. However, nine out of ten ...

The main purpose of the project is to support the school owners' work on assessing risk and facilitating and offering expedient tools and services for use in schools.

A growing number of studies from Nordic schools show that banning smartphones can have the many positive impacts. Education researchers, teachers and parents see that banning or ...

In primary and lower secondary school, digital devices are most widely used at the secondary school levels. 98 per cent of lower secondary school pupils have been given their own digital device.

Learn about their features, including weatherproofing, temperature control, and space optimization, making them ideal for outdoor installations in remote locations and urban settings.

Outdoor communication cabinets are secure enclosures designed to protect telecommunications equipment from harsh weather and physical damage. These cabinets play a ...
