---

Featuring an IP55/IP65-rated enclosure, it offers excellent resistance to water, dust, and corrosion, making it ideal for solar energy, wind-solar hybrid, off-grid, and industrial backup power systems.

This product is perhaps more commonly called a "solar battery box" but is also referred to as a "pole mount battery box". Some battery boxes are large enough to be considered battery cabinets and are ...

Our outdoor cabinets are pre-assembled for quick deployment and can operate reliably under wide temperature ranges. They ensure stable energy storage performance in challenging climates, ...

Designed specifically for solar batteries, these enclosures protect against rain, dust, and extreme temperatures. Available in stainless steel and polycarbonate for superior durability and corrosion ...

Engineered with reinforced steel enclosure and IP55/IP65 protection class for dust, water, and corrosion resistance in severe climates. Combines high-voltage lithium battery packs, BMS, fire protection, ...

The solar battery equipment cabinets are made specifically for the solar industry with an aim to make installations safer and easier for consumers. Tailored to fit your specific needs, available in different ...

With IP54/IP55 protection, anti-corrosion design, and intelligent temperature control, they are ideal for telecom base stations, remote power supply, and containerized microgrids.

Thanks to the NEMA 3R enclosure, each cabinet can be safely deployed outdoors, protecting internal components from water ingress, corrosion, and dust accumulation.
