A new berthing area on the River Elbe, outside the Port of Hamburg, is using solar power for quick-release mooring hook units with integrated capstans.

Today, at the North Sea Summit 2026 in Hamburg, the governments of Belgium, Denmark, France, Germany, Ireland, Luxembourg, the Netherlands, Norway, and the United ...

At today's North Sea Summit in Hamburg, Leaders and Energy Ministers of the North Sea region committed to cooperate closely to speed up the development of stable, secure and ...

Together with our partners, RWE is actively involved in several high-profile offshore floating solar PV demonstration projects which will allow us to gain valuable practical experience that can help us ...

A newly-built berthing area in the Elbe River is powered by nineteen solar panels. The panels provide power to quick-release mooring hook units with integrated capstans.

Building upon the Esbjerg and Ostend Declarations, the Energy Ministers of Belgium, Denmark, France, Germany, Ireland, Luxembourg, the Netherlands, Norway and the United Kingdom therefore meet ...

Hamburg takes the federal goals for the transition to renewable energies seriously: by 2030 green energies, such as wind and solar power, are projected to make up 65% of the total energy supply.

By enhancing our shore power infrastructure in the Port of Hamburg, we are making significant strides in improving air quality and working towards our goal of a climate-neutral port by 2040. The use of ...
