Wind turbines and solar panels are not living up to their longevity claims, increasing costs and filling up waste disposal sites. Inverters in solar facilities, required to convert direct current into ...

Solar panels and wind turbines have a lifespan of 25-30 years. Learn how recycling is transforming sustainability and the economy.

A Swiss startup is using reclaimed wind turbine blades instead of metal beams as horizontal supports for solar panels. Founded in 2022, Turn2Sun is based in Neuchâtel and calls its ...

With over 300,000 wind turbines installed worldwide, Swiss startup Turn2Sun uses recycled wind turbine blades as horizontal supports for solar panels instead of metal beams.

Retired wind turbines present another recycling challenge, as well as business opportunities. The U.S. wind energy industry started erecting turbines in the early 1980s and has been...

In an age of finding creative ways to recycle end-of-life products, a Swiss startup is using retired wind turbine blades as solar panel support beams.

Texas law requires wind and solar companies to fully decommission projects at retirement, removing all the infrastructure and restoring the land. But most retired wind turbines and ...

We will soon face the retirement of first- and second-generation wind turbines and solar panels, while the number of new installations will continue to grow. The use of scarce materials and ...
