-----

Small size, low power, easy installation, suitable for low-power equipment and short distance power transmission. Not using oil as an insulation medium is more environmentally friendly.

Sola Energy efficient dry-type transformers 600 Volt Class, isolation type, single and three phase, 15 kVA through 500 kVA. Indoor and outdoor models available.

Designed for outdoor service; suitable for operating meters and instruments, on both single-phase two-wire circuits, and polyphase circuits. The window-type transformer can also be used on three-wire, ...

General purpose transformers are designed for continuous operation at rated kVA. They are designed, manufactured and tested in accordance with all of the latest applicable ANSI, NEMA and IEEE ...

Superior designs, HCEP epoxy, and APG processes, are combined to produce the highest quality and reliability available in the industry for outdoor applications.

ARTECHE CR series are dry type outdoor service current transformers. The core is encapsulated with type B epoxy resin which provides excellent internal dielectric properties and ...

Medium voltage outdoor instrument transformers are used for insulation of medium voltage components and to transform voltage or current to standardized measurable values. ABB's medium voltage ...

Designed for outdoor service; suitable for operating meters, instruments, relays and control devices.
