What is a Tesla Powerwall?

The Tesla Powerwall is a lithium-ion energy storage solution designed to charge using solar power or energy from the grid. When paired with solar panels, the system directs solar energy to power your home's appliances. Any excess solar energy not immediately used is stored in the Powerwall battery for later use.

How much does a Tesla Powerwall cost?

The Tesla Powerwall 3 costs about \$15,400 before incentives and taxes are considered. At \$1,140 per kWh of storage, the Powerwall is one of the most affordable home battery solutions available. The combination of its cost and popularity earned it the first place spot in our list of the Best Solar Batteries of 2025.

Does Tesla have a Powerwall app?

It also offers the Tesla app, which gives you complete control over all of your Tesla products, including how your Powerwalls manage stored energy, your solar production if you have panels installed, charging and details about your Tesla EV, if you have one and information about your long-term energy savings using all of your Tesla products.

Is Tesla's Powerwall a sustainable battery?

Tesla gets full marks in both of these categories, as the Powerwall is a lithium-ion battery, and it's one of only two battery manufacturers -- the other is LG -- that mostly manufactures in the United States. The last thing we look at in terms of sustainability is a history of unsustainable working conditions.
