China has completed the main construction works on the world's largest vanadium redox flow battery (VRFB) energy storage project. The project, backed by China Huaneng Group, features ...

Discover 10 emerging new flow battery companies to watch in 2026 & find out how their solutions will impact your business!

As policy frameworks begin to align with the functional strengths of long-duration storage--and as market participants grow more critical of lithium's limits--flow battery technology is ...

China is accelerating the deployment of flow batteries, a promising long-duration energy storage technology. Companies are emerging, the supply chain is forming, and the project pipeline is rapidly ...

China has established itself as a global leader in energy storage technology by completing the world's largest vanadium redox flow battery project. The 175 MW/700 MWh Xinhua ...

As global renewable integration reaches critical mass, Chinese flow battery technology has emerged as a cornerstone solution. But how does this electrochemistry innovation address the Achilles' heel of ...

Chinese researchers achieved a breakthrough in their development of organic flow batteries, creating novel ORAMs that help them achieve significant numbers in aqueous flow batteries.

Flow batteries, as a crucial breakthrough direction for long-duration energy storage technology, have become a core focus area in policy layouts across multiple regions.
