How do you install solar panels on a tile roof?

The entire solar mounting system must bypass the tiles. This is typically achieved using specialized tile roof hooks. These hooks are designed to slide underneath a tile and anchor directly into the rafter. The hook's arm then extends out from under the tile, providing a solid attachment point for the rail system above the roof surface.

Should you install a solar racking system on a tile roof?

Investing in a high-quality, certified solar racking system is investing in the safety, longevity, and success of your project. Never Mount Directly on Tiles: Always use specialized tile roof hooks to anchor the mounting system to the roof rafters, bypassing the tiles completely.

How do you install a PV array on a tile roof?

Locate and mark the position for each tile roof hook on appropriate span. Remove the tile and expose the timber rafters the PV array should not be installed closer than 500mm to the perimeter of the roof including ridge line and eaves (unless verified by a professional engineer).

How do I choose a solar panel mounting system?

Follow Torque Specifications: Use a torque wrench on all bolts and clamps to prevent damage to the solar panel frames or mounting hardware. Prioritize Certified Systems: Choose a solar mounting system that is certified to standards like UL 2703 to ensure safety, reliability, and code compliance.
