Why is the telecommunications industry growing in Poland?

The telecommunications industry in Poland is among the most rapidly expanding sectors. These transformations are primarily instigated by the progressive advancement of technology, as well as evolving customer behaviors and requirements. This sector holds exceptional significance for the overall economy, influencing its development and progress.

Can mid-band deployments break Poland's cycle of mobile network underperformance?

From a regional competitiveness lens, intensive mid-band deployments have been successful in breaking Poland's cycle of mobile network underperformance, with median 5G download speeds rising by over 50% on average to 160.30 Mbps between Q1 2024 and Q1 2025.

Will Poland's new spectrum auctions delay commercial deployments?

With Poland's telecom regulator, UKE, having set among Europe's most ambitious coverage obligations for recent mid- and low-band spectrum auctions, operators are unlikely to delay commercial deployments in the newly acquired 700 and 800 MHz bands.

The pent-up demand for mid-band spectrum in Poland was evident when mobile operators like Orange, T-Mobile, and Play launched commercial services just three months after ...

The average base station export price stood at \$X per unit in 2023, declining by X% against the previous year. Over the period under review, the export price, however, recorded a ...

The report analyses the strategies of major players in the country's fixed and mobile telecoms markets, and includes market share data and operators' infrastructure status.
