Learn about Anza's platforms that provide accurate solar module and energy storage supplier pricing, tariff, domestic content, counterparty, and technical data from across the market.

Expert discussions suggest that current BESS prices are close to \$120 /kWh. Some auctions even suggest capex below \$100/kWh, although expert interviews suggest these cases ...

These are the key conclusions to be drawn from Anza's latest report into the US solar and battery energy storage system (BESS) sector, published this week.

Dan Shreve of Clean Energy Associates looks at the pricing dynamics helping propel storage to ever greater heights. This is an extract of a feature article that originally appeared in ...

In 2023, the average BESS cost per 1MW hovered around \$450,000-\$680,000. But here's the kicker: prices vary wildly based on battery chemistry, grid connection fees, and regional labor rates.

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$420,000, varying by location, system size, and market conditions. This translates to around \$150 - ...

As of 2024, the average price for a utility-scale BESS is approximately \$148/kWh 1. For a 1 GWh system, this translates to \$148 million. It's important to note that this cost includes not just the ...

A late 2025 market report shows US solar module prices stabilizing just over \$0.28/W, while battery energy storage system (BESS) prices see significant quarterly declines across project ...
