Will Chile's storage capacity double in 2032?

The energy ministry spokesperson told Dialogue Earth that the country's environmental assessment body is currently assessing the viability of 300 more storage projects, with a total capacity of 16 GW. According to some projections, between 2026 and 2032, Chile's total storage capacity could double to 4 GW.

Are battery energy storage systems a viable alternative for Chilean power producers?

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable alternative for Chilean power producers.

Will CIP launch a 220 MW / 1100 MWh battery energy storage project?

CIP will launch a 220 MW / 1,100 MWh Arena BESS battery energy storage project in Chile.

How will energy storage and electric transport be remunerated in 2022?

In October 2022, congress passed a bill to incentivise the development of energy storage and electric transport. The legislation allows energy companies to opt for remuneration for the energy they store and then inject back into the system.

The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO<sub>2</sub>, the country is exploring different solutions to ...

The Arena BESS project will be one of the first large-scale energy storage facilities in the country. It will be located in the Antofagasta region, an important area for solar power generation due ...

Why do Chilean companies need to lock down Battery Energy Storage System (BESS) quotations now for 2026 projects? With solar capacity soaring to 12.9 GW by 2025 and frequent grid instability in ...

These include the Andes Solar IV project, which will add 147 MW / 735 MWh of storage capacity; the Bolero project with 146 MW / 438 MWh; and the Arenales project, set to be the largest yet at 300 ...

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's installed storage ...

All Chilean energy storage players, ranging from IPPs to PCS providers, are now closely awaiting the

publication of the capacity market decree (DS N 62) expected in Q2 of 2024.

As Chile mandates 60% renewable energy for mines by 2025, storage isn't just about backup - it's becoming the ultimate grid chess piece. The question isn't whether to buy, but how to structure deals ...

Chile wants 70% renewable electricity by 2030, and storage is the glue holding that goal together. With tenders like this, the country could outpace Brazil's Amazon Wind Complex and ...
