How much solar power does Poland have?

As of the end of February 2025, Poland 's installed grid-connected photovoltaic (PV) capacity reached 21.8 GW, an increase of 25.7% over the previous year. Solar energy accounts for about 64% of the country's total renewable energy capacity of 34.3 GW and about 30% of its total installed power capacity of 72.4 GW.

How many solar farms are there in Poland?

Poland generates solar-powered energy from 9 solar power plants across the country. In total, these solar power plants has a capacity of 17.0 MW. How much electricity is generated from solar farms each year?

What percentage of solar PV installations are in Poland?

Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar PV capacity of 1,496GW. This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global solar PV capacity, 1.14% is in Poland.

Is Poland a good country for solar power?

The Photovoltaic Market in Poland 2025 report, released at the end of last month, found that Poland ranked fifth in the EU for new solar capacity added last year and maintained its sixth-place position in total cumulative installed capacity.

Data and information about Solar power plants and their location plotted on an interactive map of Poland.

The largest photovoltaic farm in Poland by installed capacity in 2024 was the Zwartowo farm, with a capacity of *** megawatts-peak.

Solar energy accounts for about 64% of the country's total renewable energy capacity of 34.3 GW and about 30% of its total installed power capacity of 72.4 GW. More than half of this solar capacity - ...

In September 2024 alone, 13,040 new PV plants were installed with a total capacity of 363.53 MW. 32 percent of the installed capacity is accounted for by plants below 51-kilowatt peak, 23 ...

Listed below are the five largest active solar PV power plants by capacity in Poland, according to GlobalData's power plants database. GlobalData uses proprietary data and analytics to ...

The top 10 solar developers in Poland are ranked dynamically and based on data in this article, showcasing the

individuals propelling the nation's solar business.

With an installed capacity of over 22 gigawatts by 2025, Poland will be among the top players in European solar power. This enormous growth is no longer driven solely by small rooftop ...

Explore 12 leading renewable energy projects in Poland that are powering Europe's green shift, from wind farms to solar and hydro innovations.
