Research has to have an element of discovering something new, of creating knowledge. While a literature search is one important part of a research project, it isn't research in and of itself.

In the contemporary world, energy stands as an essential driving force behind socioeconomic development. However, with the alarming levels of environmental pollution, there has ...

In a 2023 Pew Research Center survey, 7% of homeowners said they have installed solar panels on their home; an additional 28% said they were seriously considering it. Westerners ...

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital ...

The conferences covered topics including research and development, application, business, policy, social science, identity and ethics. Center researchers used public information and ...

Understanding the critical barriers and identifying effective incentives are important for the further diffusion of residential PV. This study conducts a systematic review on residential PV ...

Pew Research Center is a nonpartisan, nonadvocacy fact tank that informs the public about the issues, attitudes and trends shaping the world.
