Set regular cleans to keep your panels at peak performance. No chemicals, minimal water--just clean panels and clean energy. Tackle large commercial arrays with consistent, reliable results. Which ...

To optimise these processes and explore new technologies that enable automated inspection, the energy company is collaborating with Robotnik on the development of a new solution focused on the ...

The high-efficiency 14 W solar panel and built-in 5000 mAh lithium battery deliver up to 20 hours of runtime, while dual charging options - solar or fast adapter - with intelligent cut-off extend battery life ...

The PV AUTOBOT is a revolutionary photovoltaic panel cleaner that eliminates the need for a permanent water attachment during operation. With 8 liters of water on board, it can clean for up to ...

Robo-Tek's commercial solar panel cleaners deliver consistent, water-efficient results--without risky manual labour. Cut costs, reduce maintenance, and keep your solar assets performing at their peak.

This authentic 10W solar panel efficiently charges the skimmer's 2500 mAh battery, delivering over 18 hours of runtime for continuous pool cleaning. Constructed with UV-resistant and waterproof ...

Robotic solar panel cleaner for commercial arrays and solar farms. Efficient, durable, and built for repeat cleaning with Robo-Tek local support. Get the spec sheet.

Robotic and semi-robotic solar panel cleaners for large-scale and commercial solar farms. Compare PV AUTOBOT, PV BOT, PV Extreme and more from Robo-Tek.
