Minister Maynard noted that here in St. Kitts, the range of an electric vehicle, can span the entire island for a week on just one charge, presenting it as a feasible and beneficial option for our residents.

Other than the need for charging stations, incentives to offset the upfront cost of electric vehicles, and improvements to the federation's electricity grid were also factored in.

To support its plan, the Energy Unit will promote the development and deployment of charging infrastructure at single-family dwellings, and bus terminals and also advocate for the ...

Discover how Saint Kitts and Nevis is attracting eco-conscious citizens in 2025 with exclusive renewable energy incentives for new citizens and investors!

Honourable Maynard expressed that the Cabinet has approved concessions for EV and hybrid vehicles as part of this initiative. Additional details will be shared next month during the DRIVE ...

The current Order follows earlier import duty waivers and tax concessions on low-emission and fuel-efficient vehicles that were in effect during the current government's first term in office. These ...

The introduction of these vehicles requires the development of a supporting infrastructure, including charging stations, grid upgrades, and policies to incentivize the transition from conventional vehicles ...

Minister Maynard revealed a strategic roadmap aimed at achieving 30 per cent renewable energy usage within the next two years, with an ambitious target of 50 to 60 per cent in the next ...
