US battery storage hits record 5.6 GW in Q2 2025, led by utility-scale growth, but sourcing rules may slow future gains.

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale energy storage as a solution to rising electricity prices and soaring ...

With the addition of 3.213 GW in Q2, ERCOT surpassed the California Independent System Operator to lead the US in battery storage capacity. CAISO added 563 GW, or 9% of Q2 ...

The U.S. saw more than 3 GW/10.5 GWh of energy storage deployments in the second quarter of 2024, up 74% and 86%, respectively, from Q2 2023 and the most for any second quarter ...

A new report from the American Clean Power Association (ACP) and Wood Mackenzie shows the U.S. energy storage market set a record for quarterly growth in April through June of this ...

The US energy storage market installed 3,011 MW and 10,492 MWh in the second quarter of 2024, marking the second-highest quarter on record, following the fourth quarter of 2023 when ...

The U.S. energy-storage market set a record for new capacity built in any one quarter with a total of 1,680 MW installed in the second quarter of 2023--propelled by major growth in the...

With more than 3GW of new deployments in the second quarter of this year, "energy storage is becoming a mainstay of the power grid" in the US.
