Our battery enclosures can be pole-mounted or ground-mounted and are suitable for indoor and outdoor applications. If you are not sure which enclosure you should choose, please don't hesitate to email ...

Our modular seismic electronic equipment and Seismic racks are manufactured for stability, and our solutions are guaranteed to keep their composure in the face of seismic activity. All our seismic racks ...

How much structural stress can modern energy storage cabinets endure during seismic events? As global deployments surge 78% year-over-year (Wood Mackenzie Q2 2023), earthquake resilience ...

The test assemblies were proven to meet or exceed the seismic performance requirements and remain operational immediately after the seismic event. This paper provides a summary of the efforts that ...

Designed to meet strict industry requirements, our substation control houses provide a fully customizable, weather-resistant environment for electrical equipment, helping ensure long-term ...

Battery energy storage systems (BESS) are devices that enable energy from renewables, like solar and wind, to be stored and then released when customers need powers most.

We support PG& E, National Grid, Entergy, SDG& E, other major power utilities, and leading integrators with proven designs. When your application requires more than an off-the-shelf product, we're ready ...

Belden's Server and Switch Cabinets are certified to Seismic Zone 4 requirements, passing vibration and shock testing per GR-63-CORE Network Equipment Building System (NEBS) requirements with ...
