What are the exterior lights on a shipping container?

Our solar-powered exterior lights are motion-activated and three times brighter than standard lights, enhancing security around the container. For the interior, we offer rechargeable lights with three brightness levels, designed to illuminate even large storage areas. How are the exterior lights mounted to the shipping container?

What are solar lighting fixtures for shipping container?

Sun-In-One LED lighting fixtures for shipping container solar lighting kits provide you with enough light to get equipment or supplies out of the container, up to high-quality lighting, and allow you to use the shipping container as a workshop and have enough light to do fine detailed work.

Do shipping containers need LED lights?

Shipping containers, with their limited interior space, require lighting solutions that don't take up unnecessary room. LED lights, thanks to their sleek design and small form factor, can be easily installed in even the tightest of spaces without obstructing the overall layout.

How do I light a shipping container?

A good secondary option is to have Solar kit-powered LED Floodlights shining into the container. They are mounted on the twist-tight lock with magnets to provide external lighting around the Shipping Container. We also offer vapor-tight and explosion-proof LED container lights and LED Floodlights.

From internal lighting solutions that enhance functionality to external features that improve safety and aesthetics, here are some examples of effective shipping container lighting.
