---

Construction has begun on a gigawatt-scale green hydrogen and ammonia project in northern China, where about 1GW of alkaline electrolyzers will be powered by 1.25GW of new wind ...

Our researchers constantly research and bring you updated lists of renewable power generation projects using solar, wind, perpetual motion, footstep power generation as well as hybrid.

Relying on the advantages of Siziwangqi's natural wind and solar resources, the project strives to build a new energy industrial system integrating power generation, consumption, energy ...

The ambitious project leverages Inner Mongolia's abundant natural resources, utilizing 1.25GW of new wind power and 1.15GW of solar power to drive approximately 1GW of alkaline ...

Inner Mongolia Wulanchabu "Grid-Friendly Green Power Station" solar power plant is an operating solar photovoltaic (PV) farm in Jishengtai Town, Dorbod (Siziwang) Banner, Ulanqab, Inner Mongolia, China.

This project innovatively combines the two major links of wind and solar hydrogen production and green ammonia synthesis. Among them, the wind and solar hydrogen production section will build wind ...

Guodian Inner Mongolia Siziwangt Banner Solar PV Park is a 40MW solar PV power project. It is located in Inner Mongolia, China. According to GlobalData, who tracks and profiles over 170,000 power ...

Data and information about power plants and their location across the globe. All plotted on an Interactive world map
