A collection of lesson plans, trainings, and solar curricula ideas for educators.

Students may know a little about solar energy, as some of their homes may use solar panels for heating or cooling purposes. The following projects allow students to set up their own investigations and ...

Solar power is hot these days. Gleaming, black solar panels soak up rays on more and more rooftops of homes and businesses providing a clean, alternative source of heat and electricity. ...

Students learn how the sun can be used for energy. They learn about passive solar heating, lighting and cooking, and active solar engineering technologies (such as photovoltaic arrays and concentrating ...

Engage students ages 9-11 (4th-5th grade) with this complete STEM lesson plan focused on renewable energy. Through fun, hands-on projects, learners will explore solar, wind, and bio-energy by building ...

Summary This comprehensive science of solar lesson plan is designed for high school students, offering an in-depth exploration of solar energy.

Photovoltaic System Design and their Components teaches students how solar PV systems can be engineered to meet different situations and goals. Learn what equipment is needed to make various ...

Content s thermal energy. That discovery will lead into the idea that solar energy also provides electricity. Using the book *Running on Sunshine: How Does Solar Energy Work?*, introduce students to solar ...
